It is practically settled that Weston Vernon will not receive the appointment as register of the United States land office. He received the endorsement from the state Democratic committee but Secretary Lane has ruled that where possible none but practicing attorneys will be appointed to positions in the land offices. With this ruling to work on, a number of local Democrats are busy trying to "ditch" the professor because they do not approve of his appointment. The local members of the state committee are not very busy on the matter and in all probability the appointment will go to an outside man, although if the organization were a live one the appointment could be secured for Cache.

EMPLOYERS SUPPORT BELGIAN STRIKERS

Brussels, April 12.—Singular variations of sentiment have been developed both in the Belgian capital and in the provinces in connection with the political strike for manhood suffrage which is expected to involve 500,000 out of the 800,000 Belgian workmen on Monday next.

One strange phenomenon is the support, active or tacit, given by many employers to the movement. Some of them have even declared that they will continue their workmen's wages during the strike, while others have contributed to the strike funds or offered to take of the strikers' children.

The clerical newspapers insist that rich Liberals are privately swelling the strike funds, while Liberal and Radical clubs in various cities are openly supporting the movement by subscriptions.
